

Dr. Hartung Wilstermann

EVP Battery Systems, Webasto Group

Dr. Hartung Wilstermann, born 1969 in Heidelberg, has joined the Webasto SE in Stockdorf near Munich on February 1st 2017 as Executive Vice President Battery Systems.

Professional career

Before joining Webasto, Dr. Wilstermann worked from 1999 to 2017 for Daimler AG in different positions. Since 2009 he was General Manager of Deutsche ACCUmotive GmbH & Co. KG in Kirchheim u. Teck/Nabern where he was in charge of the development and program management of high voltage battery systems for automotive and stationary purpose.

Dr. Wilstermann joined the Daimler AG exchange group in 1999 and subsequently held various positions in the field of research, development, and production for powertrain electronics. In 2005 he took over the position as Senior Manager for “Gasoline system powertrain electronics” and was also project manager of start-stop systems. He subsequently took over the management of the “Hybrid system integration & E/E hardware”.

Education

Dr. Hartung Wilstermann studied from 1990 to 1995 electrical engineering at the Karlsruhe University of Technology. After his diploma he began his career at Daimler AG, where he obtained his doctorate in 1998 based on his research of ignition systems with integrated ion current measurement.
